EXPERIENCE

Semicolon Africa, Lagos, Africa - Software Engineer Intern

JULY 2022 — PRESENT

- Worked on the back and front-End layer of Semicolon's Library Management System and implemented Spring Security to validate Semicolon Natives accessing the application.

- Worked hand-in-hand with the front-end developers, my skills in design coming in handy when translating the UI design to an efficient, interactive, user-friendly application interface

EDUCATION

Federal College of Education — *NCE(Business Education)*

AKOKA, LAGOS
October, 2016

Henley Business School — *Business and Management*

May, 2022

Semicolon Africa — *Trainee*

LAGOS
- Interned at Semicolon Africa, studying and accumulating experience in software engineering, web development, software architecture and design thinking.

- Worked on multiple personal projects in different languages

- Tutored by Associate Professor Dr. Adeyinka Adewale pHD of Henley Business School on Business Management And Administration.

PROJECTS

My Portfolio — React-TailwindCSS
-*A basic project that showcases information about me*

Journal — Java Back-end & Kotlin Android UI
- With the help of my team, we built an Android application that allowed users to journal their everyday life and write stories together.
- We made use of the JetBrains-powered Android Studio and Kotlin in our development of the application.
